

# MOTOTRBO™ ANYWHERE

## BROADBAND PUSH TO TALK FOR BUSINESSES

### CONNECT WITHOUT LIMITS

You know the value of MOTOTRBO radio communications. The superb voice quality. The innovative features. The capacity and coverage that's tailor-made for your business. The devices that enable you to connect different teams of workers in all types of environments.

Now we've taken that a step beyond – with MOTOTRBO Anywhere, a solution that adds broadband push-to-talk (PTT) capability so mobile device users can connect to your radio system.

MOTOTRBO Anywhere is a specialized solution built around a mobile device application and a network server and gateway. It gives you the flexibility to go further, react faster and reach more people. It works almost anywhere, on any carrier's network, on most Android™ or iOS™ mobile devices.

Some of your employees may not always carry a radio. They may need to work outside your radio system's coverage area. And sometimes you need to respond to rapidly changing business conditions, while still making sure your employees can communicate together.

That's where MOTOTRBO Anywhere fits in perfectly. It enables workers to communicate with MOTOTRBO radio users and talkgroups on their mobile devices, with an easy-to-use Android or iOS application which connects via a wireline server and gateway to the MOTOTRBO radio network.

Now you can leverage your reliable MOTOTRBO network and extend communications to other mobile broadband devices. It's the ideal enhancement to MOTOTRBO – to help your business connect, grow and thrive.

# CONNECT WITHOUT LIMITS WITH MOTOTRBO ANYWHERE

## EXTEND YOUR REACH

As a supervisor heading home after the second shift, you may need to continue to monitor operations when you are outside your MOTOTRBO coverage area. With MOTOTRBO Anywhere, you can still connect – over any public cellular network. Or even using Wi-Fi.

Wherever the Internet can reach you, you can reach co-workers with your own iOS or Android mobile device. That's because MOTOTRBO Anywhere extends your secure, reliable MOTOTRBO digital radio system over any IP network to connect anyone, quickly and seamlessly. Simply install the application on your mobile device, log in, push and talk.

## REACH

For a field service technician completing jobs in various cities around the region, MOTOTRBO Anywhere allows him to connect to colleagues in the main office, even when he is not in range of the MOTOTRBO system.

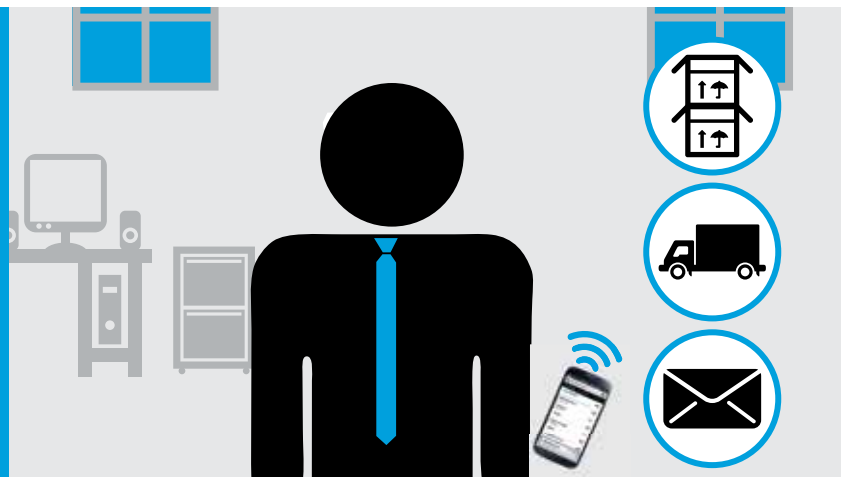

## ENHANCE THEIR CHOICES

In some situations, your workers can't carry a radio. Sometimes they are already carrying a smartphone and don't want to be burdened with a second device.

With MOTOTRBO Anywhere you have plenty of choices. Android or iOS devices, cellular or Wi-Fi, smartphone or tablet. Users simply download the MOTOTRBO Anywhere application and install it on their device. At the heart of the system, is the MOTOTRBO Anywhere server, which can be configured to accommodate your business – large or small. You can also upgrade the system later as you add more users.

### CHOICE

In a factory, MOTOTRBO Anywhere gives the plant manager the freedom to get his work done with his smart device and still remain in touch with line managers on the factory floor without the need to carry two separate devices.

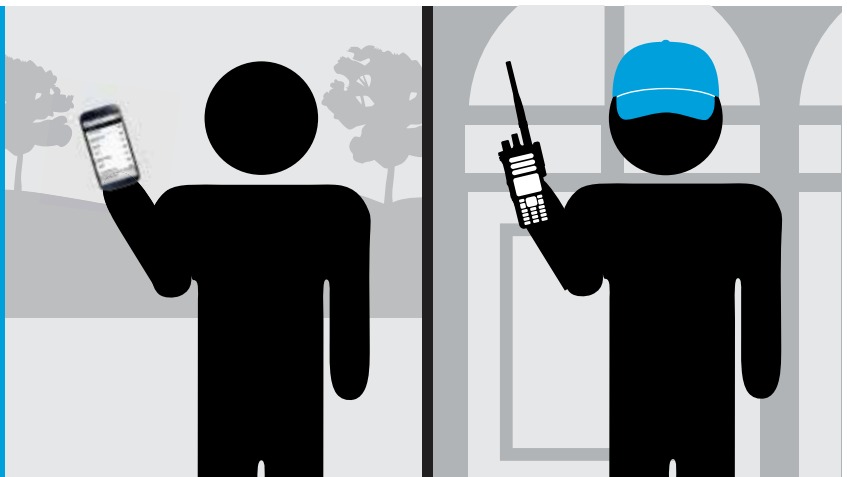

## ADD MORE FLEXIBILITY

Sometimes you need to reach new people quickly: visitors, contractors and VIPs. Sometimes you need to add new people to your operation when there are no spare radios available. Now you can use MOTOTRBO Anywhere to give those people immediate access to your system. All they need is an Internet connection and an Android or iOS mobile device.

### FLEXIBILITY

The owner of a contracting company needs to move fast to adapt to rapidly changing customer needs: he doesn't have time to program and distribute radios to temporary workers. Now, with MOTOTRBO Anywhere, he can add new staff to his radio network in a matter of minutes, and connect to them on their own smartphones.

## SCALABLE SOLUTION, MOTOTRBO EXPERIENCE

MOTOTRBO Anywhere lets you connect a large number of users and talkgroups securely and reliably. It is scalable, so you can start small today and add many more mobile devices in the future. That's the power of MOTOTRBO Anywhere – connecting many people, in many talkgroups, anywhere. That's Digital Remastered.

## MOTOTRBO ANYWHERE: CLIENT FEATURES

### UNIQUE PROFILE FOR EVERY USER

When you log in to the MOTOTRBO Anywhere application with your username and password, your unique user profile of contacts and talkgroups are loaded automatically, so that you can be productive right away.

### PRIVATE CALLS, GROUP CALLS, MULTI-GROUP CALLS

Make discreet private calls to individual MOTOTRBO users directly from your smartphone. Or connect with a whole team, group or department. MOTOTRBO Anywhere allows you to communicate with talkgroups of thousands of people at once. You can even listen to up to 16 talkgroups simultaneously.

### VISUAL ACTIVITY INDICATION

Even if you can't listen to every call, the screen of your smart device will show you exactly when a talkgroup is active, and which user is speaking.

### CALL HISTORY

MOTOTRBO Anywhere keeps a record of all the calls you've made since your last logon.

### SECURE COMMUNICATIONS

You can be confident in the confidentiality of your communications, MOTOTRBO Anywhere secures the control and voice traffic using AES 256 bit encryption.

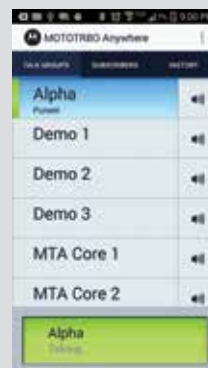

### PRIORITIZATION

The MOTOTRBO Anywhere application prioritizes private calls over group calls, and incoming cellular voice calls over private and group calls. And once your cellular call is over, normal MOTOTRBO Anywhere functionality is seamlessly restored.

### VISUAL INDICATION OF NETWORK CONNECTION

Need to keep track of your cellular data usage? The MOTOTRBO Anywhere application clearly shows you whether you're connecting via Wi-Fi, 3G or 4G.

## MOTOTRBO ANYWHERE: SERVER FEATURES

### HIGH CAPACITY

Each MOTOTRBO Anywhere Server supports up to 500 users, and uses talkpaths efficiently to get the most from your system.

### SECURE CENTRALIZED PROVISIONING

The MOTOTRBO Anywhere Server gives you robust and secure management of your client accounts. The Provisioning Portal has password protection, and is accessible remotely using an SSL-based secure mechanism.

### FLEXIBLE CLIENT MANAGEMENT

From the web-based Provisioning Portal, you can manage all aspects of your user accounts:

- Add/delete a user
- Activate/deactivate a user
- Change username/password for each user
- Associate talkgroups to users
- Create talkgroups
- Provision private call contacts for each user
- Manage client licenses

### CALL HISTORY

Call logs are maintained on the server for 7 days, and you can export the log to a file (csv format).

### SIMPLE UPGRADES

The server also provides a convenient central point for adding new features and functionality in the future. The upgrade procedure is quick and simple.
